

## **Invited Keynote Talk:**

# **CBR in numerical modelling**

Brian Knight

School of Computing and Mathematical Sciences  
University of Greenwich, London, SE10 9LS  
b.knight@gre.ac.uk

**Abstract:** This talk outlines the special use that CBR tools can be put to in engineering design. Experience in producing CBR systems using numerical models is described. The advantages of using such models is discussed, and the special problems to be overcome in the construction of the CBR models are explained. The talk is illustrated with the results of theoretical and practical work done at the University of Greenwich over recent years.
